COURSE DESCRIPTION

LAW ENFORCEMENT DESIGNATED MARKSMAN

The SPS/HGTG LEDM course provides a thorough overview of the skills needed to develop the LEDM Candidate and provides a solid foundation for these skills through the basic elements of the tactical marksman: Marksmanship and Tactics. The LEDM is a skillfully trained and well-equipped officer capable of rapid response and engagement of dangerous suspects in dangerous and rapidly developing tactical environment. This is not a sniper course, but a course designed for the rapid responder working in the patrol environment. The LEDM is not a replacement for the SWAT Sniper, but rather serves as a tactical skill bridge to the skills of SWAT while capitalizing on the rapid and nimble response capability of the patrol officer. For the small or mid-size agency with no SWAT capability, this program can enhance the agency's ability to respond to threats and interdict dangerous suspects actions, in turn, saving lives.

BACKGROUND:

The concept of the Law Enforcement Designated Marksman (LEDM) was born out of the need for a tactical rapid response asset to deal with the growing number of contemporary threats. With the increased threat of attacks on officers as well as growing terrorism and active shooter threats, the need for a bridge between the standard equipped patrol officer and the SWAT Team has been recognized. This need led us to the development of the LEDM program.

CONCEPT:

The LEDM is not a Sniper. His/her equipment and training do not reach the level of the special operations trained sniper. Instead, the LEDM, combines the rapid response capability of the patrol officer with advanced training and improved weapon systems to provide an immediate response to threats of active shooters, terrorism or law enforcement ambush. The LEDM can provide observation capability and, if necessary, accurate tactical fire support in rapidly evolving tactical situations by deploying with an advanced weapon system capable of highly accurate fire. The LEDM, equipped with an enhanced AR based weapon system equipped with a variable power optic that will surpass the accuracy and range of the standard patrol rifle will be capable of rapidly and accurately engaging threats in the field. The implementation of the LEDM program is designed to enhance the overall safety of the officers as well as the public that we serve.

PROOF OF CONCEPT - ACTUAL REPORT – “2018 - Subject impersonated officer, broke through doorway of victim's home causing injury to at least one victim. Fled on foot into woods. I was used in marksman capacity for on scene cover for officers on foot. While in an elevated, concealed position with cover of a large tree, I was able to track movement of the offender through the woods and direct officers on the ground to his location, where I provided lethal cover from a distance until he was taken into custody.”
